Subject: RE: Update on Deschutes

Thanks. I appreciate the update and your focus on this important work. Let’s check in again when you are back.

Subject: Update on Deschutes

Hi Dan,

Last Friday, Dave mentioned that I should touch base with you at some point this week on the Deschutes TMDL. I’m not sure I have any major updates to provide you, from what you may have already heard from Dave. Here is the current status:

- ∞ Ecology has been working on some requests we made with them to obtain calculations and modeling files for their work on the Deschutes. The information they can provide us with dictates, in large part, how much work we have to do ‘from scratch,’ so to speak. Thus, we had to wait on Ecology so we could get a better sense of the technical work still needed before developing the Technical Approach document. To date, Ecology has provided us with part of our request, and should be providing us the remaining files soon.
- ∞ TetraTech is now working on the Technical Approach, and should have a draft for us to review by Monday, 11/19. This draft will include a projected timeline for the project.
- ∞ The next steps will then be for EPA to review the Technical Approach, finalize it, and give TetraTech the go ahead to begin work.

Ex. 6 Personal Privacy (PP)

 I think that week or the week after will be a good time to give you a more in depth briefing of the Deschutes status, including ongoing litigation. I will plan to set something up.

Thanks,

Miranda Hodgkiss
